

POPCORN AUTOMATIC MACHINES

(TaM)

POPCORN WITH FLAVOUR

We have a production process, unique in the world, which consists in adding flavour on the corn kernel. This process makes our popcorn completely healthy, since we select the best corn in order to provide with a high quality product, without oils and fats.

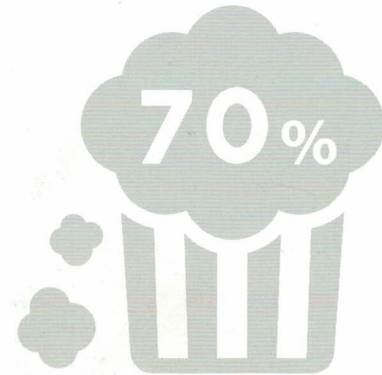

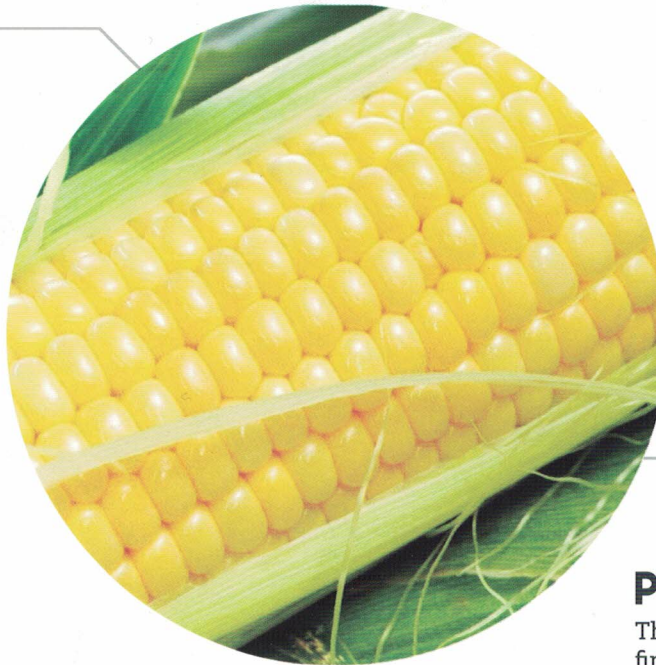

FLAVOURS

Salty butter
Extra -Salty
Sweet Caramel
Vanilla
Extra- sweet caramel

Our corn flavour is unique
and incomparable

We are in constant
development, creating
new flavours required by
our customers such as:

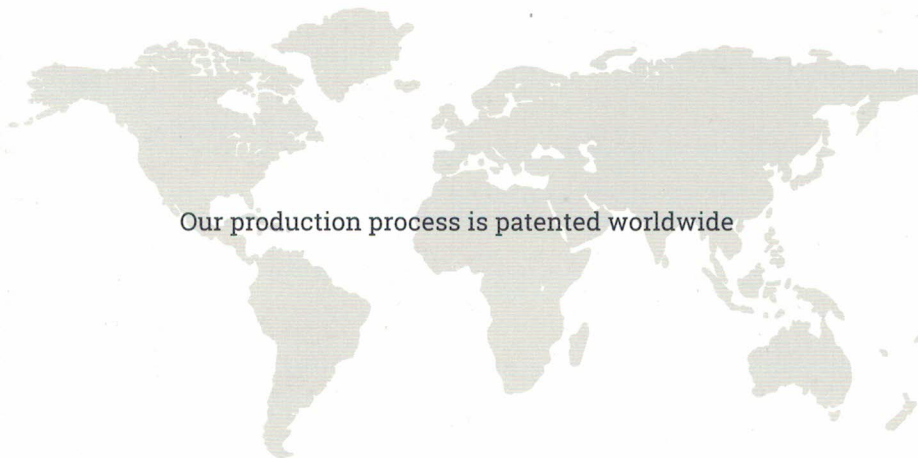

strawberry, chocolate,
cheese, spicy, wasabi...

Popcorn is eaten all over
the world

PROFITABLE BUSINESS

The cost of a portion is the 20% out of the
final price. The benefits are over the 400%.
Fast amortization!

Our production process is patented worldwide

A study carried out by the Experian
Simmons NCS shows that 94% of
the children between 6 and 11
years of age eat popcorn.

It is well-known that popcorn
is an important natural source
of antioxidants.

OUR MACHINES

VOLTAGE
230 Vac.

POWER
2.000 W.

FREQUENCY
50 Hz.

INTENSITY
8,7 Amp.

NET WIRE
Schuko
16 Amp.

AIRPOP GO!

Last generation automatic machine, 1 flavour, easy to move, lightweight. It is ideal to be placed anywhere due to its dimensions.

- Electronic Comestero RM5 cctalk multicoin.
- LED instructions Kit
- Music and voice Kit
- Lateral LED strip
- Cup capacity: 32gr. of corn
- Automatic cups output
- Wheels and handle (easy to move)

Optional features:

- Cctalk stacker billreader. Capacity of 300 o 500 bills
- LCD display Kit
- 120 Vac. to 230 Vac. Transformer Kit

WEIGHT
45 Kg.

DIMENSIONS
46x43x153cm.

AUTONOMY
160 portions

CONTAINER
5,5 Kg.

COMPACT 4

Automatic machine with traditional design, medium-sized, 1 flavour, easy to handle, with more capacity.

- Cup capacity: 32gr. of corn
- LED lights Kit
- Music and voice Kit
- Automatic cups output

200 portions

CONTAINER
6 Kg.

*with canopy: 64 Kg.

*with canopy: 52x52x182 cm

Customize your stickers with your own design/brand (min. 25 u.)

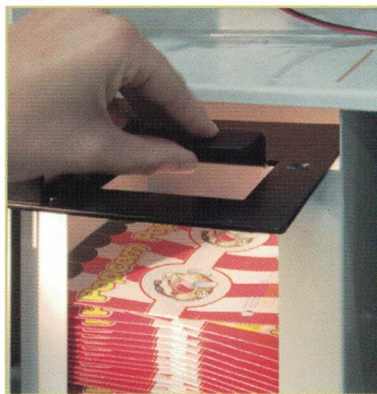

OPERATION

All our machines models work with a heat air system. Once the cooking temperature is reached, in only 85 seconds, the corn kernels pop into big pieces, tasty and crunchy popcorn. It is not necessary to add any additives (such as oils, fats, salt, sugar...) in the process of making popcorn.
